

YILFERT ROSIER ROSASOL 13.40.13+TE

1. It is rich in macro and micro nutritional elements and produced using special raw materials.
2. It is recommended to apply it in the first period of the plants, at the beginning of vegetation and before flowering.
3. It also has an effect on fruit quality when used in later stages of the plant.
4. When used in recommended doses, it has a great accelerating effect on root development and flowering.
5. It can be used in all kinds of soil conditions and is completely absorbed by the plant.
6. It can be used safely with drip irrigation, sprinkler or foliar irrigation. It is completely soluble in water.
7. Thanks to the special raw materials used in production, it is in a form that can be completely absorbed by plants even in cold soil conditions with its low pH and low EC value.
8. It has homogeneous particle size.
9. All microelements in it are chelated and produced according to European Union norms.

MACRO ELEMENTS(%W/W)	13.40.13+TE
TOTAL NITROGEN(N)	13
NITRATE NITROGEN(NO3)	3,5
AMMONIA NITROGEN(NH3)	8.5
UREA NITROGEN(NH2)	1
PHOSPHORUS(P2O5)	40
POTASSIUM (K2O)	13
MICROELEMENTS %	
BORON(B)	0.01
COPPER ETDA (FR)	0,007
EDTA IRON(FE)	0,026
ETDA MANGANESE(MN)	0,032
EDTA ZINC(ZN)	0,023
